

PROJECT TITLE:

Superstore Sales Dashboard in Excel

OBJECTIVE:

The objective of this project was to analyse Superstore sales data and create an interactive Excel dashboard to understand sales performance, profit performance, product trends, and regional performance.

DATASET DESCRIPTION:

The dataset contains 9,994 rows and 21 columns. It includes order details, customer details, product details, sales, profit, region, category, order date, and ship date.

TOOLS USED:

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Data Cleaning
- Helper Columns
- KPI Cards
- Dashboard Design

KPIs CREATED:

- Total Sales: ₹22,97,200.86
- Total Profit: ₹2,86,397.02
- Profit Margin: 12.47%
- Total Orders
- Sales by Region
- Sales by Category
- Monthly Sales Trend
- Top 10 Products by Sales

BUSINESS INSIGHTS:

- West region generated the highest sales.
- South region generated the lowest sales.
- Technology category had the highest sales and profit.
- Furniture had good sales but lower profit compared to other categories.
- Canon imageCLASS 2200 Advanced Copier was the top-selling product.
- Monthly sales trend helped understand sales movement across the year.

BUSINESS VALUE:

This dashboard helps business users quickly understand which regions, categories, and products are performing well. It also helps identify low-profit areas and supports better decision-making for sales and profit improvement.

PROJECT SUMMARY:

Created a professional Excel Sales Dashboard using the Superstore dataset. Cleaned date issues, validated data quality, created helper columns, built pivot tables, designed KPI cards, and visualized sales and profit performance using charts.
