

PROJECT TITLE: Financial Performance Dashboard in Excel

OBJECTIVE:

The objective of this project was to analyze financial data and create an interactive dashboard to monitor revenue, profit, units sold, product performance, segment profitability, and monthly revenue trends.

DATASET DESCRIPTION:

The dataset contains 700 records and 16 columns. It includes information related to countries, products, customer segments, sales, profit, units sold, discounts, and financial performance over time.

TOOLS USED:

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Data Validation
- KPI Cards
- Dashboard Design

KPIs CREATED:

- Total Revenue: 118.73 M
- Total Profit: 16.89 M
- Total Units Sold: 1.13 M
- Profit Margin: 14.23%

BUSINESS INSIGHTS:

- USA generated the highest revenue.
- Government segment generated the highest profit.
- Enterprise segment generated a loss.
- Paseo was the highest revenue-generating product.
- Revenue peaked during October and Q4 showed strong performance.

BUSINESS VALUE:

This dashboard helps management monitor financial performance, identify profitable customer segments, evaluate product performance, and track revenue trends for better decision-making.

PROJECT SUMMARY:

Created a professional Excel Financial Performance Dashboard using financial sales data. Performed data validation, KPI analysis, pivot table reporting, chart creation, and business insight generation to support financial decision-making.
